On the road to success

The News by Shahzada Irfan Ahmad (January 1, 2018)

Women form around 49 percent of the population of Pakistan, according to the population census of 2017, but unfortunately a small segment of these contribute to the economic activity of Pakistan. This definitely results in slower economic growth and limits the volume of GDP. Women form around 49 percent of the population of Pakistan, according to the population census of 2017, but unfortunately a small segment of these contribute to the economic activity of Pakistan. This definitely results in slower economic growth and limits the volume of GDP. No doubt women form a major part of the agricultural workforce but they are hardly accounted for and the work they do is mostly seasonal and unskilled. When it comes to skilled and high-paying jobs, it's mostly the men who grab these. ... [Read More](#)
